VESSELS

TELLING YOUR BRAND STORY THROUGH
BEAUTIFULLY BRITISH FRAGRANCE
EXPERTS IN CONTRACT MANUFACTURING

EVERY FRAGRANCE BEGINS WITH A STORY AND EVERY STORY DESERVES A VESSEL THAT BRINGS IT BEAUTIFULLY TO LIFE.

At SCENTELIER'S, we understand that a vessel is never just a container. It is the first impression, the tactile experience, the visual signature that defines how a fragrance lives within a space. It sets the tone, captures attention, and becomes an extension of the brand itself.

Within this collection, you'll discover a curated range of glass and tin vessels, held in stock at our factory and ready to form the foundation of your next creation. From timeless silhouettes to contemporary finishes, each piece has been carefully selected for its quality, versatility and ability to elevate a fragrance into something truly memorable.

BUT THIS IS ONLY THE BEGINNING.

Our in-house collection offers a seamless starting point - efficient, refined, and ready to bring concepts to life with ease. Yet we know that for many brands, true distinction lies in something entirely unique. That's why we work closely with our trusted network of global suppliers to source - or create - vessels of any size, material or finish. Whether ceramic, stone, metal, or something more unexpected, we collaborate on your behalf to realise designs that are as individual as the fragrance they hold.

From initial concept through to final production, our approach is deeply collaborative. We take the time to understand your brand - its identity, its audience, its ambition - ensuring every detail is considered and every element aligned. The result is more than a product; it is a cohesive, considered expression of your brand's story.

Because at SCENTELIER'S, we believe the vessel should never be an afterthought.
It should be where the story begins.
